Making the most of the space in your garden

Welcome to The Malvern Collection

Handmade quality garden buildings for over 50 years

In the early 1970s, we started to design and produce garden buildings at our factory in Worcestershire. All of our buildings are made to order and handcrafted using traditional carpentry techniques by skilled craftsmen, which are then delivered and installed by our own teams of experienced fitters across the country.

The Malvern Collection design and make a wide collection of buildings, from the humble shed right through to fully lined, insulated and double glazed garden rooms and offices designed for all year round use.

We offer a wide selection of optional extras which enable you to create your ideal garden room to meet not only your practical needs but also your own personal taste.

Our paint spraying shop is one of the most advanced spraying and drying facilities in the garden building industry, where buildings can be coated with a highly durable and weather resistant, low maintenance paint and primer system, which will protect and enhance your building.

At Malvern, we use only the highest quality materials from sustainable sources. Our redwood buildings are constructed using kiln dried slow grown pine from Sweden's Northern sawmills and our cedar buildings are constructed using Canadian Western Red kiln dried cedar.

We strongly recommend that you visit one of our display sites where you can examine for yourself the quality, design and materials used in the manufacture of our buildings. Experienced staff will be on hand to discuss your individual requirements.

Thank you for taking the time to look through our brochure.

8' x 8' Bewdley Apex with optional double doors

7' x 7' Bewdley Corner

8' x 6' Bewdley Apex

7' x 5' Bewdley Pent

Standard Features

- 13mm redwood cladding
- Heavy duty framework throughout
- All ridge heights under 2.5m
- Single door
- Black ironmongery
- Opening window(s) (quantity dependant on size and model)
- Framed ledged and braced door
- Lockable rimlock and handle door catch
- 3 door hinges per door for extra strength
- Turn button top and bottom of door
- Tongue and groove timber roof and floor
- Green polyester mineral felt
- High quality timber treatment applied throughout prior to delivery
- A wide range of sizes to choose from

Options

- Toughened glass
- Black or red polyester mineral felt
- Double doors on 8' wide models and above (excluding corner shed)
- Additional fixed and opening windows
- Pent sheds have four possible door positions: Left of front, right of front, left hand end and right hand end
- Workbenches and shelves
- A set of pressure treated floor bearers

MALVERN HEAVY DUTY PENT

12' x 8' Malvern Heavy Duty Pent in 13mm Redwood, Georgian windows & painted finish

10' x 6' Malvern Heavy Duty Pent in 13mm Redwood with chrome fittings

10' x 6' Malvern Heavy Duty Pent in 23mm Pressure Treated Barnstyle & Georgian windows

Standard Features

- 19mm heavy duty redwood cladding
- Front height under 2.5m
- Heavy duty framework throughout
- Additional diagonal framework for extra rigidity and strength
- Heavy duty floor
- Pressure treated floor joists
- Tongue & groove timber roof and floor
- Green polyester mineral felt
- Fully framed, ledged and braced single door
- 3 lever mortice lock
- 3 heavy duty hinges per door
- Single glazed 4mm toughened glass
- Black or chrome ironmongery, must be specified on the order
- 9" roof overhang to front
- Joinery made fixed and lockable opening windows
- High quality timber treatment applied throughout prior to delivery (excluding pressure treated)
- A wide range of sizes to choose from

Options

- 19mm heavy duty pressure treated, 23mm heavy duty pressure treated barnstyle or 12mm cedar cladding
- Coloured painted finish – wide selection of colours
- Heavy duty black or red polyester mineral felt
- EPDM rubber roof
- Tongue and groove lining plus insulation
- Internal partition wall
- High level security fixed windows in lieu of opening at no additional cost
- Georgian style windows
- Double glazing
- Integral Tidystore conversion
- Integral open sided area
- Composite decking upgrade to open area
- Hook and band hinges
- Security pack including 6 pin lock and security screws
- Guttering and downpipe in a choice of three colours
- Heavy duty workbenches and shelves
- Double door upgrade
- A set of pressure treated floor bearers

POTTING SHED AND CEDAR VICTORIAN GREENHOUSE

8' x 6' Potting Shed in 13mm Redwood, stable door & painted finish

Potting Shed Standard Features

- 19mm heavy duty redwood cladding
- Coloured painted finish - wide selection of colours
- Heavy duty framework throughout
- Heavy duty floor
- Tongue and groove timber roof and floor
- Green polyester mineral felt
- Guttering and downpipe in a choice of three colours
- Fully framed, ledged and braced door
- 3 heavy duty hinges per door
- Heavy duty staging under windows
- One opening vent window to the front
- Side windows
- 4mm toughened glass
- Black or chrome ironmongery, must be specified on the order
- Front roof overhang
- High quality timber treatment applied throughout prior to delivery (excluding pressure treated)
- Six sizes to choose from

Options

- A choice of 19mm heavy duty pressure treated or 12mm cedar cladding
- Black or red polyester mineral felt
- Stable door
- A set of pressure treated floor bearers

Cedar Victorian Greenhouse Standard Features

- Cedar timber throughout
- Boarded base panels all round
- Automatic roof vents
- Lockable single door opening in hinged on right
- Solid brass ironmongery
- Guttering and downpipes to both sides
- Secured to base
- High quality timber treatment applied throughout prior to delivery
- A wide range of sizes to choose from

Options

- Comprehensive paint system to protect and decorate available in a variety of colours
- Coloured painted finish - wide selection of colours
- Staging
- Shelving
- Door can be hinged on the left or made to open outwards
- Chrome ironmongery

OPTIONS AVAILABLE

Coloured Painted Finish

A comprehensive paint system is applied prior to the building leaving the factory. The paint system comprises of an initial undercoat and a further top coat of your chosen colour.

Higher Pitch Roof

For those that require extra internal height.

Tongue & Groove lining and insulation

Building is internally lined with foil back bubble insulation and covered with redwood tongue and groove matchboard.

Bitumen Felt Tiles

Roof is covered with tile effect heavy duty felt tiles.

Onduline Roof

Roof is covered with onduline corrugated sheets with roofing felt underneath.

EPDM Rubber Roof

A maintenance free synthetic rubber membrane covering the roof as an alternative to roofing felt.

Slatted Roof

An aesthetic roof made with featheredged pressure treated redwood or Western Red cedar boards to enhance the appearance of your building and provide added protection to the roofing felt beneath.

Shingle Roof

Western Red cedar shingles fixed to pressure treated joists to enhance the appearance of your building and provide added protection to the roofing felt beneath.

Slate Effect Roof Tile

Slate effect is a synthetic roof tile which emulates the appearance of natural slates and has a long life span with no maintenance required.

Guttering

Guttering is available in a choice of three colours.

Integral Open Sided Area

Malvern Heavy Duty Sheds can be divided into rooms with an open space decking area. Timber decking is used for this open area, with composite decking available as an upgrade. When choosing the open side option heavy duty flooring must be included for the whole of the building footprint.

Staging and Shelving

Timber staging and shelving are available in various lengths to suit your gardening needs.

Composite Decking

A high density, heavy duty and weather resistant wood composite.

A Set of Floor Bearers

Floor Bearers are 2" x 2" (45 x 45mm) pressure treated lengths of timber which run in an opposite direction to the floor joists making a crisscross formation, allowing good air circulation and ventilation to your garden building, taking away direct contact from the base and helps prevent damp from attacking the timbers.

IMPORTANT POINTS TO NOTE

All of our Sheds, Workshops, Potting Sheds and Cedar Greenhouses come with a guarantee against rot and decay. Twelve years for cedar, eight years for pressure treated and redwood. All other workmanship and materials are guaranteed to be free from defects and faulty installation for a period of 12 months. All of our guarantees are subject to the buildings being maintained in line with our recommendations.

Our recommendations are that all timber garden structures require ongoing maintenance following installation. Redwood & pressure treated redwood require annual timber treatment to be applied, ideally prior to the colder wetter months for added protection. We recommend all spray painted buildings are maintained on an annual basis, inspect the painted areas on the building, checking for any areas where the paint finish maybe starting to deteriorate over time, peeling or flaking and repaint where necessary. A full guide of maintenance guidelines are available on request.

All base work is the responsibility of the customer, as is the safe securing of the building once installed, excluding cedar victorian. We require a level solid base, either paving slabs, decking or concrete upon which to install your building. In the event of a base failure, it is the customers responsibility to accept delivery of the building, safely and store appropriately.

Please allow as much room as possible around the building for our fitters to work during installation, a minimum of 18". If this is not possible please contact the office to discuss.

Our installers will need clear access to carry building sections from the vehicle to your prepared base, with no height restrictions or tight, sharp corners to negotiate.

Our installers cannot lift sections over 4' in height or over buildings such as garages. If the only access is through the house, a straight run is required and many sections will not pass through doorways. Please advise us in advance if there are any difficulties regarding access.

Always make allowance for any roof overhang when buildings have to go into confined spaces.

All redwood and cedar sheds have redwood roofs and floors. Cedar buildings have cedar windows, doors and external cladding only i.e. they have redwood framing, floors, roofs and open areas. All pressure treated sheds are pressure treated throughout.

Ironmongery is black or chrome as standard and this must be specified on order. Victorian Greenhouse ironmongery is brass as standard. Chrome is available but must be specified at time of ordering.

All building dimensions shown in this brochure are approximate, based on floor sizes.

All timber used in the construction of our buildings originates from sustainable forests.

As it is our policy to continually improve products, methods and materials, we reserve the right to change specifications from time to time, we will not make any significant variations without your agreement.

All images and descriptions are for illustration purposes only. We strongly advise that you visit one of our showrooms to view the range of buildings and finishes.
